Digital Evaluation Solution

On-Screen Marking & Scanning Services

We convert paper-based answer booklets into secure digital scripts for on-screen evaluation, moderation, re-evaluation and student redressal — delivered end-to-end under Digi Parikshak's operational control.

For Universities, Boards, Autonomous Institutions, PSUs & Recruitment Bodies handling large-volume descriptive exams.

- Secure Digital Scripts
- Masked Evaluation
- Live COE Dashboard
- Role- & IP-Based Access
- Audit-Ready Workflow

Delivering Better Outcomes

Faster results | Fewer errors | Complete audit trail | Higher transparency

digi parikshak

Secure Inward & Scanning Workflow

A controlled, traceable process that converts physical answer booklets into evaluation-ready digital scripts.

1

Bundle Receipt & Tagging

Answer-book bundles securely received, verified and barcoded for tracking.

Traceable inward

2

Strong Room Storage

Scripts stored in access-controlled rooms with chain-of-custody maintained.

Secure handling & custody

3

Scanning Options

Two proven methods to suit your institutional needs.

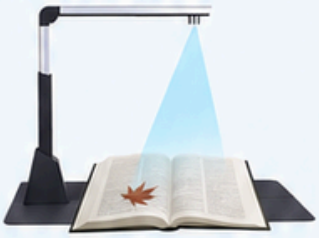

Preserved booklet integrity

Cut Scanning (High-Speed Method)

- Spine cut, duplex scan and re-stapled after scanning.
- Up to **1,500** booklets per scanner/day.
- Best for centralised high-volume operations.

Book Scanning (Non-Destructive Method)

- No cutting or unpinning of booklets.
- Up to **250** booklets per operator/day.
- Best for decentralised or space-limited setups.

4

Multi-Level Quality Check

Blur check, page-order validation, missing or double-page detection, and barcode match.

QC-validated images

5

File Indexing & Secure Upload

Scanned files tagged with roll no., subject and course details for allocation.

Secure digital allocation

digi parikshak

Digital Evaluation & Moderation Cycle

Every stage — from evaluator login to re-evaluation — is logged and auditable, ensuring accountability and data integrity.

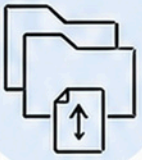

1

Evaluator Login & Access Control

Role-based, IP/device-secured login for authorised evaluators.

2

Script Allocation

Automatic or manual distribution of answer scripts as per COE-defined rules.

3

Identity Masking & Marking Setup

Candidate identity is concealed while approved marking schemes are displayed on screen.

4

Digital Marking & Annotations

Question-wise marking with comments, highlights, rubrics and scoring tools.

5

Moderation & Re-evaluation

Multi-level review without revealing previous marks, ensuring fairness and marking integrity.

6

Live COE Monitoring & Analytics

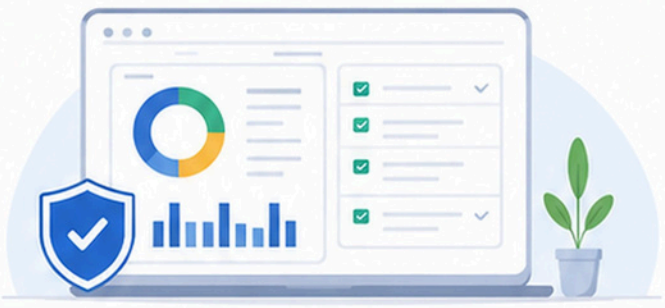

Real-time dashboards to track evaluator activity, progress and completion status.

7

Results, Re-evaluation & Redressal

Evaluated scripts become ready for result processing, re-evaluation and student redressal.

Every action is **logged** and **time-stamped** for complete traceability and audit compliance.
